

Phoenix-Diamonds

Real memorial diamonds created from the ashes or hair of your partner, loved-one or pet

Diamonds are carbon, compressed and heated by the earth over millions of years.

We convert the carbon of ashes (or hair) to make a real diamond in a laboratory, but instead of years, we can make one in weeks.

Phoenix diamonds are real - not fake, faux, CZ, Moissanite, 'essence' or DNA injected.

They possess the exact same characteristics as mined gems without the social stigma of blood, sweat & tears of conflict diamonds.

Promotional Self print bookmarks

These are best printed on 160-200gram card by bubble jet printer.

If you are stationing them in your reception, or issuing personally as they are, please ask your customer to state that you gave them the book mark as it maybe some time before they are used. Stamp or write your name or stick your card on the reverse. If you desire to add custom address data to the PDF file or .doc, please let us know.

If you need any advice, current prices, or information on new developments, please feel free to call us Mon-Sat 0900-2100 GMT, e-mail us or check out our trade area and a section called 'New Developments'.

We wish to thank you for your help in spreading the word about this unique and revolutionary method of memorialising a loved one.
