

# Phoenix Memorial Diamonds

A privately owned British company based at  
**Sunrise House, Hulley Road, Macclesfield,  
SK10 2LP, Cheshire, UK**

Tel : **0870 881 0612** [int. +44 1614199744]

e-mail [info@phoenix-diamonds.com](mailto:info@phoenix-diamonds.com)

Manufacturer of genuine memorial diamonds from both ashes ('Cremains') or from hair (burial). Featured on Ch4 TV 'Ashes to Diamonds'. One of a small handful of laboratories in the world making 'Memorial Diamond's using the HPHT\* process originally developed in Russia around 1950. \*[1300 centigrade at 10,000 tons/sq.in]

'Phoenix' made the first diamond in the world from the umbilical cord of an 'at risk' premature baby – 'The Jessica Diamond' (*neo-natal death has little remaining to use*). Jessica is alive and well, living in Manchester.

The value of the 'Jessica Diamond is in the region of £50,000 (natural Aqua blue @ \$150,000/carat). The manufacturing costs were in the region of £11,950

All diamonds are basically carbon, compressed and heated by the earth over millions of years. We extract the carbon from ashes and hair to grow a real diamond in a laboratory, but instead of years, we make them in a few months [13-15 weeks for Canary, much longer for 'Blue's and white's]

**Phoenix Memorial Diamonds are real** - not synthetic, fake, faux, CZ, Moissanite, 'Aura'? DNA or 'essence' injected. They possess the exact same characteristics as mined diamonds - without the social stigma of blood, sweat & tears or the massive upheaval of the earth.

**Phoenix Diamonds** have been certified by the Birmingham Assay Office.

**Colours** : Mostly a natural 'Canary' yellow colour, also a 'free-range' Blue, White (blue hue) and others.

**Sizes** : 0.25crt, 0.33crt, 0.5crt, 0.75crt, 1.00 – 2.00 carat. 58 facets brilliant cut.

**Prices** : from £2995 (0.5carat canary). Multiple diamonds can be made from one batch of ashes/hair and from the hair of the living and pets.
